Find 10 different model providers and their models released in last 12 months

1.Meta: Llama Guard 4 12B

Release date: Apr 30,2025

Knowledge cutoff: Aug 31,2024

Context:163,840

Cost of token: $0.18/M i/p tokens and $0.18/M o/p tokens

When to use this model: suited for research and commercial applications requiring advanced multimodal understanding and high model throughput.

2. OpenAI - 5.5

Release date: Apr 24, 2026

Knowledge cutoff: Dec 1, 2025

Context: 1,050,000

Cost of token: $5/M input tokens and $30/M output tokens

When to use this model: support for text and image inputs, enabling large-scale reasoning, coding, and multimodal workflows within a single system.

3 Claude Opus 4.7

Release date: Apr 16,2026

Knowledge cutoff: 2025

Context: 1,000,000

Cost of token: $5/M input tokens and $25/M output

When to use this model: large codebases, multi-stage debugging, and end-to-end project orchestration. from drafting documents and building presentations to analysing data.

.

4. Google: Nano Banana 2

Release date: Feb 26,2026

Knowledge cutoff: Jan,2025

Context:65536

Cost of token: $0.50/M input tokens and $3/M output tokens

When to use this model: It combines advanced contextual understanding with fast, cost-efficient inference, making complex image generation and iterative edits significantly more accessible.

5. Grok 4.3

Release date: Apr 30,2026

Knowledge cutoff: Dec,2025

Context: 1,000,000

Cost of token: $1.25/M input tokens$2.50/M output tokens

When to use this model: it well-suited for long-document analysis, deep research, and multi-step agentic tasks.

6. DeepSeek V4 Flash

Release date: Apr 24,2026

Knowledge cutoff: May,2025

Context: 1,048,576

Cost of token: $$0.14/M input tokens and $0.28/M output tokens

When to use this model: suited for applications such as coding assistants, chat systems, and agent workflows where responsiveness and cost efficiency are important.

7. Anthropic: Claude Sonnet 4

Release date: May22,2025

Knowledge cutoff: Jan 31, 2025

Context:100000

Cost of token: $3/M input tokens$15/M output tokens

When to use this model: suited for research and commercial applications requiring advanced multimodal understanding and high model throughput.

8. Qwen: Qwen3.6 Plus

Release date: Apr 2,2026

Knowledge cutoff: April,2025

Context: 1,000,000

Cost of token: $0.325/M input tokens and $1.95/M output tokens

When to use this model: it delivers major gains in agentic coding, front-end development, and overall reasoning, with a significantly improved “vibe coding” experience..

9.MoonshotAI: Kimi K2.6

Release date: Apr 20,2026

Knowledge cutoff: April,202

Context: 262,144

Cost of token :$0.75/M input tokens and $3.50/M output tokens

When to use this model: designed for enterprise tasks including tool calling, RAG, code generation with fill-in-the-middle support, text summarization, classification, and extraction.

10 Nemotron 3 Nano Omni

Release date: Apr 28, 2026

Knowledge cutoff: 2025

Context:256000

Cost of token: $0/M i/p tokens and $/M o/p tokens

When to use this model: It handles complex end-to-end coding tasks across Python, Rust, and Go, and can convert prompts and visual inputs into production-ready interfaces.
